PROFILE

Respectful self-motivator gifted at finding reliable solutions for software issues. Proficient in React and Next.js, adept at leveraging TailwindCSS and Framer Motion to create dynamic user interfaces. Well-versed in collaborating within cross-cultural, global teams and fluent in English.

PROJECTS

Portfolio Website [🔗](#)

2023/11 – 2023/12

Demo [🔗](#) Github Repo [🔗](#)

- Portfolio Website crafted with precision using React, Next.js, Framer Motion, and Tailwind CSS.
- Engage with a captivating journey through the projects showcased in the 'Work' section.
- Discover the 'About' page offering insights into proficiency in various programming languages and the wide spectrum of services provided.

Graduation Project: NARQA based on (National Academic Reference Standards) [🔗](#)

2022/02 – 2023/05

Github Repo [🔗](#)

- NARQA, a comprehensive system based on national academic reference standards developed by collaboration with a team.
- Utilized React, Tailwind CSS, and Next.js to create the system admin page and instructor interface.
- Implemented dynamic handling of the matrix and developed a course specs form for efficient data input.
- Successfully created PDF reports for course reports and course specifications using the system.
- Designed the layout of the pages and implemented a dashboard for easy navigation and data visualization.
- Developed login logic to redirect users to their respective pages based on their assigned roles.

Meetups Next.js [🔗](#)

2023/03 – 2023/06

Demo [🔗](#) Github Repo [🔗](#)

- Meetups-Next.JS , a website built using the Next.js framework that enables users to easily create, store, update, and delete meetups.
- Offering a user-friendly interface for managing meetup events and utilizes efficient server-side rendering.
- The key features include meetup creation through a form , secure storage of meetup data using MongoDB, a list of existing meetups with important details, detailed information for each meetup, the ability to update meetup details, and the option to delete meetups.
- Designed to working seamlessly on both mobile and web platforms, with responsive layouts for different screen sizes.

E-commerce course platform ↗ Demo ↗ Github Repo ↗ <ul style="list-style-type: none"> E-commerce course platform functionality for course purchasing or enrollment. User-friendly course browsing, blog, credibility through About Us. Next.js for server-side rendering and improved performance and @material-tailwind/react for UI components and styling. 	2023/09 – 2023/11
React Meal App ↗ Demo ↗ Github Repo ↗ <ul style="list-style-type: none"> React Meal App , a dynamic and user-friendly website built using React, designed to provide a seamless experience for browsing, selecting, and ordering meals online. Featuring an intuitive interface that prompts users to enter their personal information, including their name, street address, postal code, and city, ensuring accurate delivery details for a smooth ordering process. 	2023/05 – 2023/07
Image Gallery with Tailwind CSS ↗ Demo ↗ Github Repo ↗ <ul style="list-style-type: none"> Image gallery website with smooth transitions and modern styling using Tailwind CSS. The website features a visually appealing navigation and showcases a collection of images in an elegant manner. 	2023/04 – 2023/05
Pricing Cards ↗ Demo ↗ Github Repo ↗ <ul style="list-style-type: none"> Pricing Cards website with smooth transition effects and modern design using Tailwind CSS. Created three options to choose from: Basic, Standard, and Premium. 	2023/04 – 2023/06
